

Health Coaching for Clients with Weight Management Goal

Enjoy Higher Success Rates of Client Fat Loss Programme through Effective Coaching System

Course Overview

The prevalence of overweight and obesity along with chronic, inactivity-related diseases is on the rise. Since obesity is a multifactorial disease involving a complex interplay among environmental, behavioral, genetic and hormonal factors, training these clients requires more than just looking at the energy balance; exercise more, and make better food choices. By having deeper understanding of client's background and challenges, health coaches facilitate goal setting, help clients overcome barriers and choose strategies which fits into their lifestyle.

Health Coaches are uniquely positioned as skilled partners who can help individuals change behaviours that create health risks, as well as empower individuals to better self-manage their weight and chronic health conditions. Thus, clients is able to sustain healthy lifestyle behaviors that prevent, mitigate and even reverse chronic diseases.

Thus, elevate your career by becoming a health coach. Learn the science and skills to support meaningful and lasting lifestyle change for those you are called to serve. As a health coach you'll expand your skillset and move your career forward enabling your to help people while earning additional income. You'll also gain greater flexibility to work with others when and how you want, including even virtually by phone or video.
